RE: Southern Talc - Chatsworth, Georgia

Dear Ms. Oliver:

Enclosed is a copy of the application for Southern Talc's new talc processing facility. Note that Southern Talc has requested much of the process information relating to types, sizes and locations of process equipment to be kept confidential. You may wish to contact Southern Talc directly about the possible release of any of this information.

We have no specific information in our files regarding the minerology of the raw materials used at Southern Talc. However, I have enclosed some information assembled by EPD's Geologic Survey Branch concerning the mineral deposits mined by Southern Talc.

Feel free to contact us with questions.

Sincerely,

Ronald C. Methier  
Unit Coordinator  
Air Pollution Compliance Program
